To all the Class Governor STAT Program: Invoice to SCPS **500K/Governor Office 1.2 Million\$ 30 days to pay it... 10% fees after that**

In Java, a HashMap is part of the java.util package and is a collection that maps keys to values. It allows for **efficient lookups, additions, and deletions**. Here's how you use a HashMap in Java:

Basic Syntax and Example

1. **Import HashMap:** import the HashMap class.

```
java

import java.util.HashMap;
```

2. **Create a HashMap:** create a HashMap by specifying the types of the keys and values.

```
java

HashMap<KeyType, ValueType> map = new HashMap<>();

    • KeyType: the type of the keys (e.g., String, Integer).
    • ValueType: the type of the values (e.g., String, Integer).
```

For example, if you want a HashMap with String keys and Integer values:

```
java

HashMap<String, Integer> map = new HashMap<>();
```

3. **Adding key-value pairs:** Use the put() method to add key-value pairs.

```
java

map.put("One", 1);
map.put("Two", 2);
map.put("Three", 3);
```

4. **Accessing values:** To access the value associated with a specific key, use the get() method.

```
java

Integer value = map.get("Two");
System.out.println("Value: " + value);
```

5. **Removing key-value pairs:** You can remove a key-value pair by using the remove() method.

```
java

map.remove("Two");
```

6. **Checking if a key exists:** Use the containsKey() method to check if a specific key exists.

java

7. **Iterating over the entries:** very important to check convergence use a for-each loop to iterate over the keys, values, or both.

- **Iterating through keys:**

java

```
for (String key : map.keySet()) {
    System.out.println(key + ": " + map.get(key));
}
```

- **Iterating through values:**

java

```
for (Integer value : map.values()) {
    System.out.println(value);
}
```

- **Iterating through key-value pairs:**

```
java
for (Map.Entry<String, Integer> entry : map.entrySet()) {
    System.out.println(entry.getKey() + ": " + entry.getValue());
}
```

Test Program Code

java

```
import java.util.HashMap;

public class HashMapExample {
    public static void main(String[] args) {
        // Create a HashMap with String keys and Integer values
        HashMap<String, Integer> map = new HashMap<>();

        // Add key-value pairs
        map.put("One", 1);
        map.put("Two", 2);
        map.put("Three", 3);

        // Get a value by key
        System.out.println("Value for key 'Two': " + map.get("Two"));

        // Remove a key-value pair
        map.remove("Three");

        // Check if a key exists
```

```

        if (map.containsKey("One")) {
            System.out.println("Key 'One' exists.");
        }

        // Iterate through the key-value pairs
        System.out.println("\nAll entries in the map:");
        for (Map.Entry<String, Integer> entry : map.entrySet()) {
            System.out.println(entry.getKey() + ": " + entry.getValue());
        }
    }
}

```

Output:

Value for key 'Two': 2
Key 'One' exists.

All entries in the map:
One: 1
Two: 2

Key Methods of HashMap:

- put(K key, V value) – Adds a key-value pair.
- get(Object key) – Retrieves the value for a specific key.
- remove(Object key) – Removes the key-value pair for a given key.
- containsKey(Object key) – Checks if a key exists in the map.
- size() – Returns the number of key-value pairs in the map.
- clear() – Removes all entries in the map.

Notes:

- A HashMap is not synchronized, meaning it is not thread-safe by default. If you need synchronization, consider using `Collections.synchronizedMap()` or `ConcurrentHashMap`.
- HashMap does not maintain the order of insertion. If you need to maintain the order, use `LinkedHashMap`.

Subject: Urgent Situation and Professional Concerns

Dear Governor Glenn,

I am writing to inform you of an urgent and concerning situation. I led a significant initiative for the STAT Governor CTE/Business/Computer Science program at Stafford County Public Schools, which ultimately resulted in a lawsuit involving executives and management associated with the program. My focus throughout the project was to provide high school graduates with professional certifications that would better prepare them for the workforce in particular AI module. the success rate in these programs is in single digit

Please find the attached PDF documents for further details. Recently, students have reached out to me independently seeking assistance with their computer programming challenges more than a year since I pushed away for reporting what is aberrant in a public school system well before it happened two months earlier. Following an incident for which I had no involvement, I was asked to resign. This situation led to severe health complications, resulting in chest pain and high blood pressure, ultimately requiring emergency room treatment. It became clear that the individuals responsible for the three-hour uncoordinated school lockdown were those I had already reported about two months prior. The lack of leadership displayed by the newly appointed principal—executive HR director particularly regarding the CTE/Business STAT Governor program—was evident.

Despite being asked to resign, I refused and was placed on medical leave with pay. However, without prior notice, this was later converted to unpaid administrative leave, followed by the refusal to renew my contract. As a result, I was left with no choice but to invoice the school district and the STAT Governor program for providing programming solutions to students, including completing assignments originally assigned by other teachers.

I am highly qualified and internationally recognized in my field. However, the immense stress and unhealthy working environment have left me unable to work and in a dire financial situation, as I am the sole provider for my three children. As of January 14th 2025, I have been evicted from my home.

This situation is critical and requires immediate attention. I urge you to review the attached documents and provide any assistance or guidance on how best to address these urgent issues.

Thank you for your prompt attention to this matter.

vahiphopandnews 17 year old Stafford County teen was assaulted and had water poured on him by staff member of Brooke Point High School . Teen is being criminally charged with assault and battery after allegedly putting his hands on the teacher first . Parent attempted to address the situation with administration . The principal continued to yell out words like "students like you " "parents defending their punk kids " as mother and son were removed from the school by office and administrators . Point of views ? What do y'all think ?

Hotline: 1-800-368-1019
TDD: (215) 861-4440
Fax: (215) 861-4431

Stafford County Sheriff's Office has been actively investigating several incidents recently, spanning a range of offenses. Here's a breakdown of the incidents they've been handling:

ASSAULT

- Brooke Point High School: On February 12 at 11:19 a.m., Deputy A.L. Chaves responded to an assault incident at Brooke Point High School. Two students were reportedly involved in a fight, resulting in one assaulting school staff who intervened. A criminal complaint for assault and battery was filed.
- The assault comes after nearly 20 Brooke Point students were suspended, and two teachers were assaulted in separate assaults on Jan. 29, 2024. The county sheriff placed the school on lockdown on that date.
- Following the assaults, the school division announced the end of its "power hour" lunch periods, which allowed high schoolers to roam freely around campus.
